

The 59th Annual

National Heifer Sale

SUPPORTING JERSEY YOUTH

Saturday, July 2, 2016 | 1:30 p.m. (PDT)
Sheraton San Diego Hotel and Marina, San Diego, Calif.

The sale is a virtual sale and will be broadcast live on

JerseyAuctionLive.com

SUPPORTING JERSEY YOUTH

Today, there are 3,788 Junior Members of the American Jersey Cattle Association, more than there are active lifetime members. They have the same registration privileges as lifetime members, but also the incentives of a comprehensive program leading to national recognition for their achievements.

The National Heifer Sale provides the funds for that program, which includes:

- The All American Junior Show, which provides the thrill of competition and introductions to lifelong friends;
- the National Jersey Youth Production Contest and the Pot O'Gold program, which create incentives for keeping production and management records;
- national scholarships that help pay for hands-on work experiences and college educations;
- the National Jersey Youth Achievement Contest, recognizing the breadth and depth of accomplishments over time;
- Jersey Youth Academy, whose mission is to attract, educate and retain talented young people for careers in the Jersey dairy business; and
- the Young Jersey Breeder Awards, recognizing the accomplishments of early-career AJCA members.

As you turn the pages of this catalog, look how deeply the consignors to this year's National Heifer Sale have dug into their herds and pledged their support for AJCA youth development programs. This, in turn, presents tremendous opportunities for you—and for the coming generations of Jersey breeders.

Youth programs and scholarships through the American Jersey Cattle Association gave me endless opportunities. Scholarships helped me attend college and in turn exposed me to a broader spectrum of the dairy industry. Various achievement and production awards allowed me to travel to Louisville, where I developed lifelong friendships.

Brett Barlass, Co-Chair, 2016 National Heifer Sale

In my career, I have been involved in education, extension and bull procurement and am currently the genetics specialist for Ahlem Farms Partnership. Much of this story is due to my involvement in youth programs and thanks to the support of Jersey breeders through the National Heifer Sale. Investing in our National Jersey Youth Program is one of the best ways to forge durable connections with young people and ensure a strong future for our breed.

Jonathan Merriam, Co-Chair, 2016 National Heifer Sale

"Do not let your children and other Jersey youth across the country miss out on these activities."

Brett Barlass

Since 1957, this sale has paid for those activities. Please bid generously on July 2.

SUPPORTING JERSEY YOUTH

The 59th Annual National Heifer Sale

Saturday, July 2, 2016 1:30 PM (PDT)
Sheraton San Diego Hotel and Marina, San Diego, Calif.

Special Presentation The **Kenny Stiles Memorial Award** will be presented to the consignor of the highest selling animal.

This year's National Heifer Sale will be virtual with no animals actually present the day of the sale. Videos and photos of the animals will be played on the big screen during the sale with bidding taking place live at the Sheraton San Diego Hotel and Marina and online at Jersey Auction Live.com.

The live broadcast of the sale will begin at 1:30 p.m. (PDT) on Saturday, July 2. Bid from anywhere online with this service. Log on at sale time and see the sale...live.

Please bring this catalog to the sale with you.

Animals are catalogued by age order ... from youngest to oldest.

Health Requirements: All animals will be tested negative for leukosis, BVD-PI, tuberculosis, and anaplasmosis.

Animals will be tested for Brucellosis and interstate health papers will be written at the time of shipment. All animals will be given a shipping fever booster and will be parentage verified.

Annual Meeting Headquarters
Sheraton San Diego Hotel and Marina
1380 Harbor Island Drive,
San Diego, CA 92101
619/291-2900 phone

Discover, Visa, MasterCard, and American Express accepted.

NOTICE TO ALL BIDDERS ON A CHANGE TO PAYMENT TERMS: Cash, Check, Debit Card, Visa, MasterCard, American Express or Discover accepted. 3% buyer's premium on all sales with 3% waived for cash or check.

The pedigrees in this catalog are prepared by sale management using the most recent pedigree information available. Breeding and production information is provided to us by the consignors. Although information is verified to the best of sale management's knowledge, management cannot guarantee against errors or omissions.

All announcements from the box on sale day, take precedence over printed materials.

The American Jersey Cattle Association and National All-Jersey Inc., promote the use of authentic and unaltered photographic images of Jersey animals, and disapproves of the use of any photographic images that alter the body of the Jersey animal. The American Jersey Cattle Association therefore requests that all photographic images of Jersey animals submitted for publication in catalogs of Jersey Marketing Service contain no alterations to the body of the animal.

Despite its best efforts to ensure that only unaltered photographs of Jersey animals are used in this publication, the American Jersey Cattle Association cannot guarantee that every photographic image of a Jersey animal is authentic and unaltered.

Pedigree = Proven Performance

The production is bred into every heifer selected for the National Heifer Sale.
Buyers of previous consignments have realized the benefits of this potential.

TERMS AND CONDITIONS FOR CONSIGNMENT SALES

Adopted December 31, 2005 by the American Jersey Cattle Association

TERMS: The terms of the sale are cash, check, or wire transfer for the full purchase price in U.S. funds on sale day. Parties unknown to the seller or sale management must furnish a statement or letter from his/her bank or a certified check. The seller, sponsor, or sale manager reserves the right to require payment by wire transfer, certified check, or in cash. If other arrangements for payment are made with the seller, a written agreement acknowledging such terms and signed by both parties must be filed with the sale clerk prior to release. All payments must be made to the sale clerk. No release will be given prior to a satisfactory settlement, whereupon a signed order from the clerk must be presented to the loading supervisor. Seller retains title until payment has been honored unless other arrangements are made. Buyers are entitled to warranties as listed below only after full compliance with these terms.

SALE POSITIVE: The highest bidder shall be the buyer. Every animal is pledged to absolute sale unless withdrawn for cause as determined by the sale manager. In case of dispute the animal shall again be put up for advance bids, and if there be no advance bid, the animal shall be sold to the person from whom the auctioneer accepted the last bid. If two or more claim the bid, the auctioneer shall indicate the party whose bid was recognized. Other claimants will be given an opportunity to increase the bid. Bidding directly or indirectly on an animal in which the bidder or any person for whom the bid is made has an ownership interest is prohibited unless the intention to bid is disclosed specific to each animal in the catalog or announced from the auction stand.

CERTIFICATES OF REGISTRATION: Certificates of registration or identification (whichever applies) showing transfer to the buyer on the records of the American Jersey Cattle Association will be furnished by the seller for each animal at no cost within a reasonable period of time. An animal may not be transferred back to the seller for a period of one year except at the discretion of the American Jersey Cattle Association. Registration certificates show registration on the records of the American Jersey Cattle Association, but are not documents of title.

CATALOG INFORMATION: The material in the sale catalog has been carefully edited. Any errors, omissions, or information noted after printing of the catalog will be announced from the auction stand. Such announcements will take precedence over printed matter in the catalog. In any event, neither the sponsor nor the sale manager shall be responsible for errors or omissions.

RISK: All animals are at the buyer's risk as soon as struck off, but will be cared for at no cost for 24 hours. Buyers must make arrangements for care of their purchases beyond the 24 hour period. Animals are solely at the seller's risk prior to being struck off, including that time while under the care and supervision of the sponsor or sale manager.

WARRANTIES:

- (a) **Title.** The seller warrants clear title to the animal and other items sold and the right to sell the same.
- (b) **Breeding.** The seller guarantees his/her animals to be breeders, but not beyond the purchase price, with the following understanding:
 - Males:** Should any bull within four months after the sale date or within four months after reaching the age of fourteen months, whichever is later, fail to prove a breeder after being used on a registered Jersey female known to be a breeder, the matter shall be reported in writing to the seller who shall have four months from the date the bull is returned to him/her to prove him to be a breeder, before refunding the full purchase amount or making other satisfactory settlement with the buyer.
 - Females:** Any female that has freshened normally within ninety days prior to the date of sale is, by that fact, considered to be a breeder. Should any other female when fresh over ninety days fail to become pregnant within four months of the sale date, or if she is less than sixteen months old when sold fail to become pregnant by the time she reaches the age of twenty months, after having been bred to a registered Jersey bull known to be a breeder and after having been treated by a licensed veterinarian, the matter shall be reported in writing to the seller within 90 days of the applicable limit, and the seller shall then have the privilege for four months after receiving the animal to prove her a breeder before refunding the full purchase price or making other settlement satisfactory to the buyer. Females bred when sold and pronounced in calf are presumed to be pregnant, but pregnancy is not guaranteed unless so announced. The seller makes no warranty that pregnant females will deliver calves or that they will carry them full term. Superovulation or flushing of a female after the sale negates any breeding warranty. Unless notice has been given to the sale manager prior to sale date and is noted in the catalog or announced from the auction stand that a female has been superovulated or flushed prior to sale date, the seller warrants that such is not the case. For animals that have been superovulated or flushed, a complete record of all embryo transfer offspring, pregnancies, and frozen embryos by service sire are to be given to the sale manager.
- (c) **Embryos.** Only Grade 1 embryos collected and processed by an embryo transfer business (ETB) certified by the American Embryo Transfer Association (AETA) will be sold. Sale manager will have a copy of the Certificate of Embryo Recovery and Certificate of Freezing (AETA Forms A and C) before and during any sale.
- (d) **Choice of Pregnancy.** Should an animal chosen from a specified flush fail to meet the breeding warranties, or should an animal of the sex specified by the buyer not result from a specified flush, the buyer and seller will take the following steps:
 1. Seller will offer the choice of remaining animals from the specified flush, and/or
 2. Seller will offer the choice of another flush already implanted or of a future flush. If the buyer accepts the choice of a future flush, unless otherwise agreed no interest will be charged to the buyer, but payment schedules will remain the same.
 3. If neither of the above options are acceptable to the buyer, the seller will make full refund of all payments received.
- (e) **Limited Warranties. The Seller makes no other warranties, express or implied, including without limitation, merchantability or fitness for a particular purpose. All warranties cease when an animal is resold or transferred by the original purchaser.**

HEALTH CERTIFICATE: The seller will provide to the buyer an official health certificate for interstate shipment of each animal. No warranty is made as to the condition or health of the animal or the result of any future health test or as to the condition of an animal's udder following calving. Herd and/or area accreditation and certification status and calthood vaccination status will be printed in the catalog or announced from the auction stand. Health tests and condition for export sales to foreign countries or states with special health requirements are the sole responsibility of the buyer unless otherwise announced from the auction stand or otherwise agreed prior to sale between the seller and the potential buyer.

SHIPPING: Assistance will be given in loading and shipping animals after the sale but no risk is assumed by anyone associated with the sale when such assistance is given. All costs, risks and responsibilities are borne by the buyer, and transportation charges on all animals subject to adjustment shall be paid by the buyer, unless other arrangements are made.

ABSENTEE BIDDERS: While it is preferable for prospective bidders to attend the sale in person, for the convenience of those not present, members of the sales force will represent you at the sale. Others handling bids for absentee buyers should identify themselves to the sponsor or sale manager before the sale to ensure that the terms of the sale are complied with. Any person handling a bid for an absentee buyer does so as agent only and is not responsible to the buyer for any animal he may purchase in that capacity.

RESPONSIBILITY: The seller is solely responsible for all warranties, as to animals or other property offered for sale. The sale manager, auctioneer and sponsor are acting as agents only and are not responsible for the title, condition, quality, fitness, or productiveness of any animals or other items sold.

Examination of all purchases should be made immediately after purchase, and any complaint must be reported to the sale manager before the close of the sale. Neither the sale manager, the sponsor, the seller, the auctioneer, nor anyone associated with the sale shall be responsible for accident, injury or property loss to anyone attending the sale. The sale manager, sponsor, and auctioneer shall not be liable for payment of the purchase price of any animal or other item sold. In submitting entries and/or selling animals or other items, the seller agrees to the terms and conditions set forth herein and assumes full responsibility of his or her animals.

PENALTIES: Violations of these terms and conditions shall be considered unethical sales practices and shall subject the violator to such penalties as may be imposed by the American Jersey Cattle Association.

BIVENS & COMPANY, LLC
A Professional Dairy Commodity Consulting Firm

What We Offer: Bivens and Company, LLC provides professional consulting services for all facets of commodity purchasing, inventory management and delivery.

What We Do: We generate savings by reducing commodity cost while assisting clients and their nutritionist to optimize the best possible rations.

How We Do It: As a member of our group, clients are working with a team that has over 37 years of experience in the industry. We leverage volume and strategic based opportunities in many markets.

You have a consulting Nutritionist ...
You have trusted Veterinarians ...

Adding a professional commodity consultant to your team will enhance your bottom line.

Elanco

Even the best producers
need a little help protecting
their dairy herds.

Introducing Imrestor™ (pegbovigrastim injection)—the first-of-its-kind immune restorative for periparturient dairy cows and heifers, available only by veterinary prescription.

During the critical time around calving when a dairy cow's immune system is suppressed, Imrestor helps restore the function of a cow's immune system to reduce the incidence of clinical mastitis by 28% in the first 30 days of lactation in periparturient dairy cows and periparturient replacement dairy heifers, helping protect her potential and the well-being of the entire dairy.

It's just the helping hand a dairy producer needs.

To help protect the whole herd with Imrestor as part of an ongoing herd health management program, contact your veterinarian or Elanco representative.

DEDICATED *to the* **DEDICATED**

Important Safety Information: No withdrawal period or milk discard time is required. In case of accidental self-injection, wash the site of injection thoroughly with clean running water. Foreign proteins such as pegbovigrastim have the potential to cause anaphylactic-type reactions. Do not use Imrestor to treat cows with clinical mastitis. Some cases of hypersensitivity-type reactions have been observed in studies. Abomasal ulcerations/erosions were observed in safety studies; it was concluded that these findings were not clinically relevant. For complete safety information see product label information.

Elanco

Imrestor™

(pegbovigrastim injection)

Elanco
Imrestor™ pegbovigrastim injection

AH0955

15 mg pegbovigrastim per 2.7 mL single dose syringe
 For subcutaneous injection in periparturient dairy cows and
 periparturient replacement dairy heifers.

CAUTION: Federal (USA) law restricts this drug to use by or on the order of a licensed veterinarian.

DESCRIPTION: Imrestor is a sterile injectable formulation of pegbovigrastim (an immunomodulator, bovine granulocyte stimulating factor) in single-dose syringes. Each syringe of Imrestor contains pegbovigrastim (15 mg), L-arginine hydrochloride (94 mg), L-arginine (40 mg), and citric acid monohydrate (17 mg).

INDICATIONS FOR USE: For the reduction in the incidence of clinical mastitis in the first 30 days of lactation in periparturient dairy cows and periparturient replacement dairy heifers.

DOSE AND ADMINISTRATION: This is a two-dose regimen. The same dose is used regardless of cow/heifer body weight. Remove surface dirt from the injection site area before injecting. Inject the entire contents of the syringe subcutaneously. Do not reuse the syringe. Administer the first dose (syringe) 7 days prior to the cow's or heifer's anticipated calving date. If necessary, the first dose may be administered within a range of 4 to 10 days prior to the anticipated calving date to accommodate management schedules. Administer the second dose (syringe) within 24 hours after calving.

Animals that calve either less than or more than 7 days after the first dose should receive the second dose within 24 hours after calving.

Prior to administration, Imrestor should be visually inspected for particulate matter and discoloration. Imrestor is a clear, colorless solution and may contain a few small, translucent or white particles. Imrestor should not be used if it is discolored or cloudy, or if other particulate matter is present.

Do not shake or tap the syringe prior to use.

WARNINGS:

RESIDUE WARNING: No withdrawal period or milk discard time is required when used according to the labeling.

HUMAN WARNINGS: Not for use in humans. Keep out of reach of children.

USER SAFETY WARNINGS: In case of accidental self-injection, wash the site of injection thoroughly with clean running water. Foreign proteins such as pegbovigrastim have the potential to cause anaphylactic-type reactions. If you experience swelling or redness at the site of exposure, or more severe reactions such as shortness of breath, seek medical attention immediately and take the package insert with you. Report the event to Elanco Animal Health at 1-800-428-4441. To obtain a Safety Data Sheet, contact Elanco Animal Health at 1-800-428-4441.

PRECAUTIONS: Do not use Imrestor to treat cows with clinical mastitis because effectiveness has not been demonstrated for this use.

ADVERSE REACTIONS: Some cases of hypersensitivity-type reactions have been observed in studies outside the United States within five minutes to two hours, occurring most often after the first administration of Imrestor. Clinical signs may include elevated respiratory rate, dyspnea, urticaria, sweating, dependent edema, swollen mucous membranes, and/or hypersalivation, and, rarely death. These reactions resolve within hours of onset with or without therapeutic intervention and have not been shown to recur with subsequent injections of Imrestor. Abomasal ulcerations/erosions were observed in the Margin of Safety studies. (See Target Animal Safety section).

To report a suspected adverse drug event, contact Elanco Animal Health at 1-800-428-4441. For additional information about adverse drug experience reporting for animal drugs, contact FDA at 1-888-FDA-VETS or <http://www.fda.gov/AnimalVeterinary/SafetyHealth>.

CLINICAL PHARMACOLOGY: Endogenous granulocyte colony stimulating factor is a protein (cytokine) which induces increased production of mature neutrophils from bone marrow stem cells and activation of the functional capabilities of mature circulating neutrophils.

Pegbovigrastim is a modified form of bovine granulocyte colony stimulating factor conjugated to polyethylene glycol (PEG). This PEGylation technology enables sustained biological activity of the protein. In one study, cows treated with 20 µg/kg pegbovigrastim displayed statistically significant increased absolute neutrophil counts relative to the untreated control group beginning 5 hours post-dosing. Absolute neutrophil counts peaked 36 hours post-dosing and remained elevated up to 12 days post-dosing.

EFFECTIVENESS: The effectiveness of Imrestor for the reduction in the incidence of clinical mastitis was demonstrated in a multi-site natural infection field study conducted at four sites in the U.S. and one site in France. A total of 801 healthy periparturient commercial dairy heifers and cows were enrolled and treated with Imrestor or saline by subcutaneous injection in the neck when they were identified as being approximately 7 days before their anticipated

calving date (Day -7), and again within 24 hours after calving (Day 0). Each quarter of each enrolled animal was evaluated at each milking from Days 3 to 30 to monitor the development of clinical mastitis. Animals developing clinical mastitis (using quarter health, milk quality, and California Mastitis Test [CMT] evaluations) through Day 30 were classified as treatment failures. Administration of Imrestor resulted in a statistically significant difference ($p = 0.025$) in the incidence of clinical mastitis (treatment failure rate) across all five sites with a difference in favor of the Imrestor-treated group (failure rate: 60/331 = 18.13%) compared to the saline-treated group (failure rate: 85/338 = 25.15%).

TARGET ANIMAL SAFETY:

Margin of Safety: In the first study, forty primiparous and multiparous Jersey cows were assigned to one of four treatments: saline control, 1X, 2X, or 3X the intended dose of Imrestor administered at Days -7 and -3 prior to anticipated calving date and within 24 hours after calving. Cows and heifers were monitored daily until 4 days postpartum. Calves were monitored daily for 14 days after birth. Measurements on cows included bodyweights, feed consumption, milk production, somatic cell counts, physical examinations, and clinical pathology. A complete postmortem examination was conducted on each adult animal. Measurements in calves included physical examinations, bodyweights, and hematology. There were no test article related findings associated with abnormal clinical observations, feed consumption, milk production, physical examinations, or urinalysis in adult animals. A mature neutrophilia was seen in all treated animals, regardless of dose group. This was considered a test article related change and consistent with the mechanism of action of Imrestor. No test article related hematology changes were observed in the calves. Observations of mastitis, metritis, and abomasal ulcers were documented, with more animals in the treated groups affected compared to the controls. Two animals (one each from 1X and 3X groups) had perforated abomasal ulcers found at necropsy.

A second study evaluated the margin of safety of pegbovigrastim in multiparous Holstein dairy cows. Forty-five multiparous Holstein dairy cows were assigned to one of five treatments: saline control, 1X, 2X, 2.5X, or 3X the recommended dose of one syringe of pegbovigrastim administered subcutaneously on Day -7 relative to the anticipated calving date and within 24 hours after calving. Cows were monitored daily until 14 days postpartum. Measurements included bodyweights, feed consumption, milk production, somatic cell counts, physical examinations, and clinical pathology, including reticulocyte counts and fecal occult blood. A postmortem examination that focused on the gastrointestinal tract, uterus, and mammary tissue was conducted on each cow. Calves were not evaluated in this study. There were no test article related findings associated with abnormal clinical observations, feed consumption, milk production, or physical examinations. A mature neutrophilia was observed in all treated animals which was consistent with the Imrestor mechanism of action and was similar to what was observed in the first margin of safety study. Treated animals had a greater number of mild gastrointestinal erosions and small areas of reddened or thinned mucosa along various portions of the gastrointestinal tract as compared to the control animals. No abomasal ulcers were seen on necropsy.

It was concluded from these studies that abomasal ulcerations/erosions could be test article related. However, given the lack of clinical signs associated with such gastrointestinal pathology in conjunction with the mild nature of the erosions in the second study, it was concluded that these findings were not clinically relevant.

Injection Site Safety: Injection site safety was evaluated following the injection of Imrestor into healthy periparturient dairy cows. Results of the injection site toleration study showed that subcutaneous injections of pegbovigrastim administered 14 days prior to slaughter in 6 cows had no gross lesions and would require no carcass trim at slaughter. Additionally, subcutaneous injections of pegbovigrastim administered approximately 12 hours prior to slaughter in 6 cows caused minimal acute local tissue reactions generally characterized by focal hemorrhage and edema and would be removed along with the hide at the time of slaughter and would not result in any carcass trim.

Reproductive Safety: Animals in the effectiveness study were also evaluated for reproductive safety. This study included 801 animals: 401 control animals and 400 treated animals. Variables measured included daily health observations on cows and calves, mortality, gestation length, percent live births, and first service conception rates following treatment. There were no statistically significant differences between treated and control animals for these reproductive variables.

STORAGE INFORMATION: Store under refrigeration (2° to 8°C; 36° to 46°F). DO NOT FREEZE. Avoid prolonged exposure to sunlight. Excursions of up to 24 hours at room temperature (15° to 30°C; 59° to 86°F) are allowed after receipt.

DISPOSAL: Dispose of used syringes in a leak-resistant, puncture-resistant container in accordance with applicable Federal, state and local regulations.

HOW SUPPLIED: 10, 50 or 100 single-dose syringe packages with each syringe containing 15 mg of pegbovigrastim.

NADA 141-392. Approved by FDA.

**BLAZING NEW TRAILS
STARTS WITH CUTTING A PRECISE SWATH.**

A NEW WORLD DEMANDS NEW HOLLAND.

For over 50 years, the Speedrower® self-propelled windrower has built a legacy of innovation designed to meet any field head-on and cut or swath it in record time. Speed is of the essence, so are unmatched power, durability and precision. Innovative features like IntelliSteer™ auto-guidance and PLMTM Connect Telematics give you the control and accuracy to work at an unparalleled level of efficiency, pass after pass. JerseyMate™
with BullsEye

Jersey Journal

... and so much more—including lower fees for intraherd and female transfers submitted within 60 days of the date of sale, transfers for all bulls sold*, the lowest rates for genomically testing your animals, special pricing on JerseyTags, no-cost membership in regional Young Sire Sampling group, the \$100 *Journal* Advertising Advantage benefit—

to REAP more from your investment in Registered Jerseys™.

REAP

gives you more of what you need, for one price and from one place.
Enroll today. Call AJCA Herd Services at 614.861.3636.

Save 5% on REAP by paying your fees in full.

* Free bull transfers require application to be received within 60 days of the date of sale

your REAP program benefits

Deliver the value of AJCA programs with every sale—and for less money than you might think.

Make sure your customers earn top profits. Registration transfers are **the new owner's ticket to AJCA performance and type information and official CDCB genetic evaluations**—exactly what they need to make mating decisions, build pedigrees and create merchandising opportunities for the genetics that bear your prefix.

The more you sell, the lower the transfer fee with REAP.

Female and embryo transfers filed within 60 days of sale date during your 12-month REAP enrollment period on a cumulative basis:

- 1 to 20 transfers processed, \$12.00 per transfer;
- 21st to 60th transfer, \$10.00
- 61st to 100th transfer, \$8.00
- 101st to 200th transfer, \$6.00
- 201st to 600th transfer, \$4.00
- for each transfer after 601, \$2.00

Intraherd transfers and transfers made over 60 days from date of sale are included in your cumulative total for determining transfer fee.

Complete The Sale.
